- MOHAMMED ALOTHMAN

## Summary for the project:

We are planning to build A social media platform that the users will be able to post posts and can chat and share their daily activities with their friends. The website is going to be for normal user or content creator who want to share their contents or product. The website will let the users to schedule posts and edit posts also the users can share up to 6 photos in one post and share a long video with high quality.

## The use-case diagram
